

## Commercial Opportunity

### Plaster Room Techniques CD (ref: 449)

*A complete visual guide to common plaster room techniques and practices*

#### Overview

For the first time a CD-ROM has been introduced providing a practical step by step approach to plaster room techniques and practices.

This series of Multimedia CD-ROMs is ideal for SHOs, Junior Doctors or anyone who needs to use a hospital plaster room facility on an occasional basis. All modules feature Step-by-Step visual guides and bitesize sections of information - excellent as a quick and easy source of reference.

Please note that all the modules contain photographs, illustrations, X-Rays, step-by-step guides and video sequences.

- Module 1: Basic plaster room techniques

This is an introductory module and features basic plaster room techniques, common fracture types (including X rays and displacement, health & safety, cast removal and bad casting techniques

- Module 2: Upper limb casting techniques

This module features full step-by-step guide to upper limb casting techniques.

- Module 3: Lower limb casting techniques

This module features full step-by-step guide to lower limb casting techniques.

- Module 4: Casting complications
